Office Action Summary

Art Unit: 1616

Receipt is acknowledged of IDS, Declaration.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-18 are 36-45, drawn to Particles, classified in class 424, subclass 405.
- II. Claims 19-35, drawn to methods of viewing, classified in class 523, subclass 122.

The inventions are distinct, each from the other because:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the particles may be made by materially different processes, such as extrusion.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 1616

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

A telephone call was made to Attorney S. Szecepanori on 9/15/2000 to request an oral election to the above restriction requirement, but did not result in an election being made.
